Bell & Stephens are still extending ore sufficient from their l'actile mine to keep their mill running and producing gold buillon as of ore. Twelve thousand dollars worth was shipped just week.

Hirstherger is bard at work on his Western mine, and he is getting good resuits. He is only working a small force at present, but he expects to greatly increase it in the near future when he has blanew hoister in operation, which is expected to be in readings within the next four weeks. W. C. Chandler is at work night and

day on his Mountain Key, and he is putting his labor where it will do the most good. He is working at present on the upper levels, and be is getting out rich ore in quantities. The lower levels are still under water, and as there is a procpect of a dry season, they will remain so for yet a while longer. The Golden Giant mine, of which men-

tion has frequently been made in the HEADLIGHT, is proving all this paper predieted from the beginning, a brilliact success and as development work progresses it is proving a bonauza, even beyoud the foodest espectations of its owners. The Giant has passed the chrysalletic stage by reason of developments recently made, and it is now a full

fledged mine, and a good one at that. The Atlantic-Deep Down people are not allowing much grass to grow under their feet, but they are working with an energy which can bring no other result but abucess. Manager Schookley evidently understands his business, and bebelieves in striking the iron while it is hot. Within the past two mouths he has had a wonderful amount of work performed, and he will no doubt be amply repaid when he gets a mill run.

The Maud 8, mill is running on over from the Gray Hawk and Maud 5, mines. The former is producing about 25 tons per day that several teams and pack antmals are transporting the ore to mill. Some very clok-ore was struck last week Profesion to fet proper
